## Press Release

Traversetolo, Italy | May 13, 2026

# Fornovo Gas joins Burckhardt Compression

**Fornovo Gas has entered into Burckhardt Compression's acquisition project to further develop a European presence capable of competing in the global gas compressor market.**

**Traversetolo, Italy – May 13, 2026 – Fornovo Gas** announces an important milestone in its corporate development and growth. Burckhardt Compression has signed an agreement to acquire **Fornovo Gas**, opening a new phase of growth, international expansion and industrial continuity for the Italian company based in Traversetolo, in the province of Parma.

Founded in 1969, **Fornovo Gas** has grown substantially worldwide, driven by innovative technologies and a high quality of service. The company has become a recognized player in the gas compression sector, building its reputation on technical expertise, flexibility, customer proximity and a strong specialization in reciprocating compressors and integrated systems. Over more than 55 years of activity, **Fornovo Gas** has developed solutions for natural gas, biogas, CO<sub>2</sub>, hydrogen and technical gas applications, supporting customers across different energy and industrial sectors.

Founded in 1844 as a mechanical workshop, **Burckhardt Compression** is today a global leader in the reciprocating compressor systems market and offers a complete range of reciprocating compressor technologies and services. In fiscal year 2024, Burckhardt Compression achieved record financial results, exceeding CHF 1 billion in revenue for the first time.

Burckhardt Compression Holding AG is headquartered in Winterthur, Switzerland, and has been listed on the SIX Swiss Exchange since 2006.

This step represents an important recognition of the path undertaken by **Fornovo Gas**, its people and its know-how. The company has successfully established itself in the European market, particularly in the biogas and compressed natural gas sectors, thanks to its ability to design reliable, configurable compression solutions tailored to specific application requirements.

By joining Burckhardt Compression, **Fornovo Gas** will become part of a global industrial group with a strong international presence and extensive experience in compression technology. This will create new opportunities to bring **Fornovo Gas'** solutions, expertise and product range to a broader global platform, while preserving the company's identity, technical culture and close relationship with customers and partners.

For **Fornovo Gas**, the acquisition represents an acceleration of a path already underway: strengthening its role in the energy transition, expanding its international presence and continuing to develop reliable compression solutions for the needs of a constantly evolving market.

**Dr. Ferdinando Bauzone, CEO of Fornovo Gas, commented:**

“New horizons of international development are opening up for **Fornovo Gas**. The combination of state-of-the-art technologies in the compressor industry will be an important driver of growth and professional development for the people of **Fornovo Gas** and for its local area.

Joining Burckhardt Compression represents a fundamental milestone for **Fornovo Gas** and recognizes the value of what we have built over more than fifty years. Our history, our people, our technical expertise and our customer-oriented approach remain at the heart of our identity.

This new chapter gives us the opportunity to grow further, supported by the global presence and industrial strength of Burckhardt Compression. Through this operation, we bring together our past and present to build a shared future with ambitious goals.”

The completion of the acquisition is expected within the next two months. Further details will be shared by Burckhardt Compression during its Annual Media and Analyst Conference on June 4, 2026.
